

CaymanToolbox

Installation and first steps

1. USB stick and copy protection

With the purchase of the CaymanToolbox software, you will receive a USB memory stick that contains the setup of the program as well as a license file.

Important: The USB stick must be plugged in when using the software!

2. Preparation

Insert the memory stick into a free USB port of your computer, on the associated drive you should see the following files:

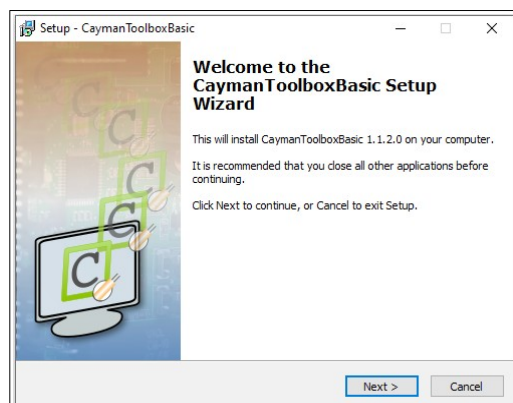

- The license file with the purchased license: "license...CaymanToolbox....zip".
- The installation file "CaymanToolboxBasic....setup.exe" and, if necessary, the installation file "CaymanToolboxERP..._setup.exe".
- You can also get the latest setup file(s) at https://caymantoolbox.com/caymantoolbox_latest.zip

Name	Date modified
 CaymanToolboxBasic_1_0_2_0_setup.exe	.2019 13:11
 licence_customer_demo_CaymanToolboxBasic_...	.2019 14:52

3. Installation

First run the program "CaymanToolbox**Basic**_X_Y_setup.exe" (X_Y represents the version number of the program) and follow the steps of the installation wizard.

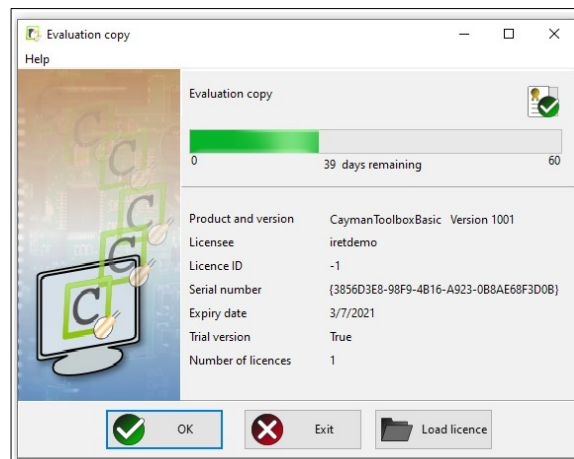

- Recommended is the installation to "c:\CaymanToolbox\".
- Write permissions are required in the program folder even during operation
- If necessary, install "CaymanToolbox**ERP**..._setup.exe" into the same directory (e.g. "c:\CaymanToolbox\").

4. Licensing

During program installation, a time-limited demo license is automatically

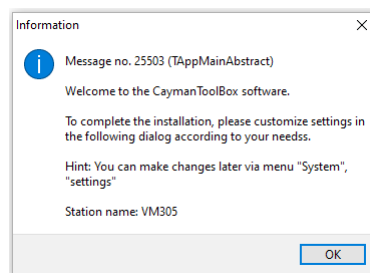

activated. When the program is started, the remaining trial period and other license information are displayed.

Note: Press the "Load license" button and load the purchased license file ("license_....zip") from the USB stick. You can also activate the license at any later time from the running program.

5. Basic setup

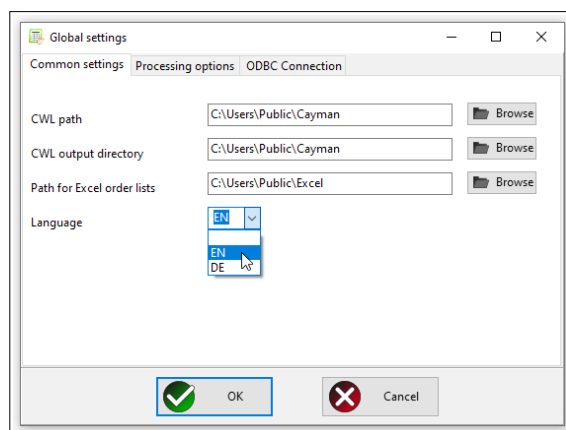

At the first start of the ToolBox a new station with the name of your computer will be created on your PC. Confirm the hint with "OK".

6. Settings

In the following setup dialog, select and save the station settings, e.g. the user language.

Note: You can change these settings at any time by calling up the "Settings" menu item in the main program.

7. Confirm your entries with "OK".
